Education

University of Wisconsin–Madison 2026 – May 2028 (expected)
B.S. in Computer Sciences

The Chinese University of Hong Kong 2024 – 2026
Mathematics and Information Engineering; transferred to UW–Madison

Research Interests

I am interested in learning and adaptation through interaction and feedback, with a focus on robotics: adapting robot policies to contact-rich manipulation with limited new experience. My background is RL post-training of vision–language models with verifiable rewards.

Research Experience

CUHK MMLab, research intern with Prof. Xiangyu Yue 2025 – present
PhysEvolve (co-first author; led method, training and evaluation) and OpenGame (second author, core contributor).

Independent 2026 – present
Built an SO-101 arm at home for teleoperation data collection and ACT closed-loop experiments.
